

FISHy Design Competition

Want to fly your “fishy” art @ 30 km up?

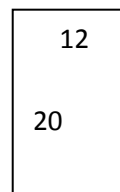

Now is your chance! You could have your art printed and stuck to the outside of reel.SMRT’s FISH. Late in Autumn this year, reel.SMRT (real smart) will be flying their experiment high in the sky onboard a balloon. We’ll be dropping the FISH (attached to a fishing reel of course) to experiment with free fall conditions.

We’re boring scientists and engineers, so we want to make our FISH prettier by putting four students’ art on the outside! If you’re between 4 and 18 years old you can enter in our four categories (ages 3-6, 7-10, 11-14 and 14-18). We’re looking for creative, colourful, original and of course fishy designs to put on the outside of our FISH.

We’ll send you a signed certificate, a copy of your art and a mission patch (all flown to 30 km so long as everything goes well). Each of the four winners can also fly an item of their choice of up to 50 gm (so long as it’s not dangerous, that means no bombs).

Submit your fish themed art (12 x 20 cm or 8:15 aspect ratio, .jpg no larger than 1 MB) to reel.smrt@hotmail.de by September 11th.

We’ll select the designs we find the most interesting and exciting. We want to past fish themed art on our FISH but be inventive!

Read about the reel.SMRT at <http://smrt.name/bexus/> and find out more about the high altitude balloons at <http://rexbexus.net/>.
